SKILLS

Full stack developer

SCRUM

BDD

Empathy

Logical thinking

Analysis capabilities

Initiatives to share with the team

Passion for teaching

Intermediate - advanced english

MARLON JAVIER RUIZ TARUCHAIN

Backend & Web Developer

Profile

I'm a programmer with 4 years of experience working with technologies such as HTML, CSS, JavaScript, Web frameworks, ReactJS, Amplify and Apollo Client.

On the back-end side, I have a strong background working with Python. I have used frameworks like Flask and Django, tools like Jinja, SQLAlchemy to interact with SQL databases like MySQL and PostgreSQL. I also have knowledge in GraphQL, specifically with the Graphene-SQLAlchemy library, to create flexible and robust APIs. In addition, I use Docker, which allows me to deploy applications quickly and efficiently.

Besides I use Git as version control system.

My education and experience allows me to create high quality work, my flexibility and ability to embrace change, my resistance during difficult and challenging situations and I'm always interested in expanding my knowledge and technologies skills.

FREELANCER (2019 – 2021)

Back-end and web developer using technologies like HTML, CSS, Git, JavaScript, React Apollo Client, and Python, Jinja, Flask, GraphQL

BITPROY (2021 - 2023)

Full stack developer and development of hybrid mobile applications with React Native – Expo. Web, Back-end and Mobile Project Supervisor with Jira, Slack and Figma
